

How to update the language files for Waterpolo

- 1) Run the self-extract zip file *language files.exe*.
- 2) This program show you the default path where it will extract the data. If you had installed the Waterpolo in an other folder, please, change this path.
- 3) From that moment, the software could be set in *English, French or German*.
- 4) The data, like Period name and category name will only use new language when you create a **new** database.
If you want to change an exiting database, you have to do the following copy and rename it like shown just below :

From: C:\ARES\WPOLO32\

If you want to have those data in english :

To: C:\ARESDB\YOUR_WP_DB\

If you want to have those data in french :

Factory settings : WP1

Lstcat.tx0	→	Lstcat.txt
Cfgperi.tx0	→	Cfgperi.txt

Or in french :

Lstcat.tx1	→	Lstcat.txt
Cfgperi.tx1	→	Cfgperi.txt

or in german :

Lstcat.tx2	→	Lstcat.txt
Cfgperi.tx2	→	Cfgperi.txt
